

Fold each printed sheet in half lengthwise. The left side of the document will list the term and the right side will list the definition. Tape or staple the open edges of your flashcards. Cut out your flashcards on the solid lines indicated and fold them on the dotted lines.

**Module2: Section A: Facilities
Planning and Network Design**

Term
licensing

APICS CLTD Learning System

© 2023

Definition

Paying a fee for permission to manufacture and sell a product created by another.

**Module2: Section A: Facilities
Planning and Network Design**

Term
square root rule

APICS CLTD Learning System

© 2023

Definition

A technique that assists planners to calculate the change in total safety stock needed to maintain customer service levels within a distribution network when the number of stocking locations is changed. [It] states that total safety stock inventories in a specified number of facilities can be approximated by multiplying the total amount of inventory in existing facilities by the square root of the ratio of number of future facilities divided by the number of existing facilities.

**Module2: Section A: Facilities
Planning and Network Design**

Term
heuristics

APICS CLTD Learning System

© 2023

Definition

A form of problem solving in which the results or rules have been determined by experience or intuition instead of by optimization. Heuristics can be used in such areas as forecasting, lot sizing, or determining production, staff, or inventory levels.

**Module2: Section A: Facilities
Planning and Network Design**

Term
center-of-gravity approach

APICS CLTD Learning System

© 2023

Definition

A methodology for locating distribution centers at approximately the location representing the minimum transportation costs between the plants, the distribution centers, and the markets, in order to maximize revenue.

**Module2: Section A: Facilities
Planning and Network Design**

Term
optimization models

APICS CLTD Learning System

© 2023

Definition

A class of mathematical models used when the modeler wishes to find the ideal (maximum or minimum) value of some objective function subject to a set of constraints.

**Module2: Section A: Facilities
Planning and Network Design**

Term
simulation

APICS CLTD Learning System

© 2022

Definition

1) The technique of using representative or artificial data to reproduce in a model various conditions that are likely to occur in the actual performance of a system. Frequently used to test the behavior of a system under different operating policies. 2) Within MRP II, using the operational data to perform what-if evaluations of alternative plans to answer the question, "Can we do it?" If yes, the simulation can then be run in the financial mode to help answer the question, "Do we really want to?" See: what-if analysis.

Module2: Section B: Risk Management

Term
risk management

APICS CLTD Learning System

© 2023

Definition

The identification, assessment, and prioritization of risks followed by coordinated and economical application of resources to minimize, monitor, and control the probability and/or impact of unfortunate events or to maximize the realization of opportunities.

Module2: Section B: Risk Management

Term
ISO 31000

APICS CLTD Learning System

© 2023

Definition

A standard adopted by the International Organization for Standardization that outlines principles and a set of guidelines to manage risk in any endeavor. The standard includes guidelines for understanding risk, developing a risk management policy, integrating risk management into organizational processes (including accountability and responsibility), and establishing internal and external risk communication processes. [This] is not a management system standard and is not intended or appropriate for certification purposes or regulatory or contractual use.

Module2: Section B: Risk Management

Term
risk acceptance

APICS CLTD Learning System

© 2023

Definition

A decision to take no action to deal with a risk or an inability to format a plan to deal with the risk.

Module2: Section B: Risk Management

Term
risk avoidance

APICS CLTD Learning System

© 2023

Definition

Changing a plan to eliminate a risk or to protect plan objectives from its impact.

Module2: Section B: Risk Management

Term
risk mitigation

APICS CLTD Learning System

© 2023

Definition

Reducing exposure to risk in terms of either its likelihood or its impact.

Module2: Section B: Risk Management

Term
business continuity planning

APICS CLTD Learning System

© 2023

Definition

Plans to ensure that an organization is capable of continuing to deliver products or services at acceptable predefined levels following a disruptive incident. The plans are developed by identifying potential threats to an organization and the impacts to business operations those threats might cause. These plans provide a framework for building organizational resilience with the capability of an effective response to safeguard the interests of key stakeholders, reputation, brand, and value-creating activities.

Module2: Section B: Risk Management

Term
business continuity
management system (BCMS)

APICS CLTD Learning System

© 2023

Definition

Part of the overall management system that establishes, implements, operates, monitors, reviews, maintains, and improves an organization's capability of delivering products or services at acceptable predefined levels following a disruptive incident. It is based upon identifying potential threats to an organization and the impact to business operations from those threats. The system provides a framework for building organizational resilience with the capability of an effective response that safeguards the interests of its key stakeholders, reputation, brand, and value-creating activities.

Module2: Section B: Risk Management

Term
ISO 22301

APICS CLTD Learning System

© 2023

Definition

An international standard that specifies requirements for setting up and managing an effective business continuity management system.
